Definitions

1) Underlying items are adjusted for unrealised changes in value for energy contracts and significant non-recurring items, up to and including the operating profit.

2) EBITDA margin, underlying (%): (Operating result before depreciation and amortisation x 100)/Gross operating revenues.

3) ROACE, underlying (%): (Operating profit adjusted for share of profit/loss in equity accounted investments, unrealised changes in the value of energy contracts and significant non-recurring items x 100)/Verage capital employed (rolling 12 months).

4) Capital employed: Tangible fixed assets + Intangible assets + Non-interest-bearing receivables + Inventories - Payable tax - Other short-term and long-term interest-free debt + Group contribution allocated, not paid.

RECORD HIGH PRODUCTION

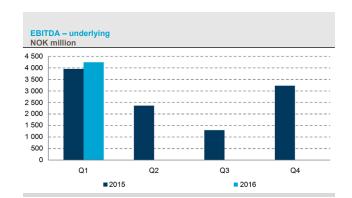

Statkraft's total power production was record high and gave a solid result.

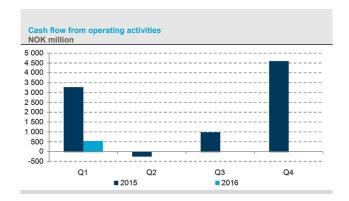

In the first quarter of 2016, Statkraft achieved an underlying operating profit before depreciation (EBITDA) of NOK 4250 million, an increase of NOK 289 million compared with the corresponding period in 2015. The net profit ended at NOK 2389 million. This was a decrease from the same quarter in 2015 which was dominated by large positive unrealised currency effects.

Statkraft's total production was record high and amounted to 19.4 TWh. Production in the Nordic's was 17.9 TWh, which was an increase of 3.1 TWh compared with the same period last year. Statkraft has been able to utilise the flexibility in the production system to generate in periods with higher prices.

The average Nordic power price was 23.9 EUR/MWh in the first quarter. This was a decrease of 15% compared with 28.2 EUR/MWh in the corresponding quarter in 2015, but higher than the previous quarter. The increased hydropower production in Norway and Sweden more than counterbalanced the effect of lower prices in the corresponding period last year. New capacity from International hydropower contributed to further increase the EBITDA.

In the first quarter, Statkraft and its partners decided to invest in the 1000 MW wind power project comprising six onshore wind farms in Central Norway. Statkraft's share in the project is 52.1%. The construction work has started. The project is eligible for el certificates and commissioning will be completed in 2020.

Corporate social responsibility and HSE

Serious environmental incidents	0	0	0
Full-time equivalents; Group	3 761	3 390	3 795
Absence due to illness, Group (%)	3.3	3.6	3.0

¹⁾ Includes employees and suppliers in plants where Statkraft owns 20% or more. Third parties (not employees or contractors) are not included.

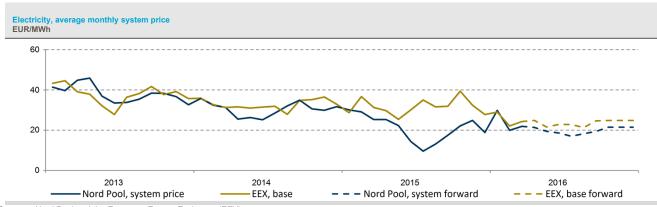

- → The Group's TRI rate was 3.7 in the first guarter.
- → There were no serious environmental incidents during this quarter.
- → Absence due to illness was somewhat lower than in the first quarter of 2015.

Two serious injuries were reported in the first quarter 2016. A Statkraft employee in District heating suffered an eye injury after coming in contact with chemicals. In Agder Energi an employee was injured from a fall while undertaking construction work in a tunnel. Both accidents have been investigated and corrective actions have been initiated.

Market and production

Power prices and optimisation of power production constitute the fundamental basis for Statkraft's revenues. The majority of Statkraft's output is generated in the Nordic region. Power prices are influenced by hydrological factors and commodity prices for thermal power generation.

POWER PRICES

Sources: Nord Pool and the European Energy Exchange (EEX)

The average system price in the Nordic region was 23.9 EUR/MWh in the quarter, a decrease of 15% compared with the same period in 2015. The price decrease in the first quarter was driven by a strengthened hydrological balance. Forward prices in the Nordic region increased in the short end of curve and decreased further out on the curve.

The average spot price in the German market (EEX) was 25.1 EUR/MWh in the quarter, a decrease of 22% compared with the same period in 2015. Power price development was influenced by falling fuel prices and an oversupplied ETS market. Forward prices in Germany fell somewhat during the quarter.

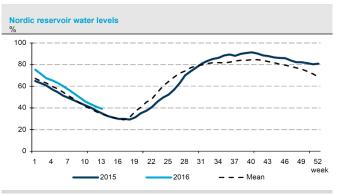

The average system price in the UK was 34.6 GBP/MWh in the quarter, a decrease of 18% compared with the same period in 2015. The decrease was driven by higher temperatures than normal and falling fuel prices.

²⁾ TRI rate: Number of injuries per million hours worked.

CONSUMPTION AND RESOURCE ACCESS IN THE NORDIC REGION

	First qu	Year	
TWh	2016	2015	2015
Consumption and output			
Nordic			
Nordic consumption	116.2	110.5	379.4
Nordic output	118.6	112.7	393.8
Net Nordic import(+)/export(-)	-2.3	-2.3	-14.4
Norway			
Norwegian consumption	40.8	38.6	130.1
Norwegian output	44.9	41.5	144.7
Net Norwegian import(+)/export(-)	-4.1	-2.9	-14.6

Source: Nord Pool.

The inflow was higher than normal in the period. Total reservoir level in the Nordic region was 115% of normal level. The reservoirs were filled to 39.2% of capacity (34.9% in 2015), with a maximum reservoir capacity of 121.4 TWh at the end of the quarter.

In the first quarter, a net volume of 2.3 TWh was exported from the Nordic region, on par with the corresponding period in 2015.

STATKRAFT'S POWER PRODUCTION

Statkraft's production is determined by water reservoir capacity and reservoir water levels, access to resources (inflow and wind), the margin between power and gas prices (spark spread) and power optimisation.

	First qu	First quarter	
TWh	2016	2015	2015
Production, technology			
Hydropower	18.6	14.9	53.1
Wind power	0.6	0.6	2.5

FIRST QUARTER

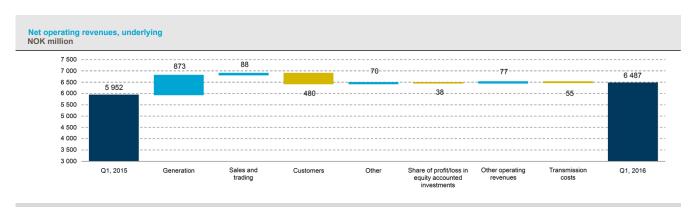

The quarterly report shows the development in the first quarter of 2016 compared with the first quarter of 2015, unless otherwise stated. Figures in parentheses show the comparable figures for the corresponding period in 2015.

GROSS OPERATING PROFIT (EBITDA) – UNDERLYING

The underlying EBITDA was NOK 4250 million, NOK 289 million higher than in the same quarter in 2015. The increase was primarily a result of higher Nordic hydropower production and increased contribution from the Group's international operations.

OPERATING REVENUES - UNDERLYING

	Fi	First quarter		
NOK million	2016	2015	Change	2015
Net operating revenues, underlying				
Generation	5 409	4 656	754	15 391
Sales and trading	1 038	1 202	-164	4 267
Customers	6 666	7 237	-571	25 629
Other	559	500	59	4 010
Sales revenues	13 673	13 595	78	49 297
Share of profit/loss in equity accounted investments	376	413	-38	683
Other operating revenues	277	200	77	1 281
Gross operating revenues	14 326	14 209	117	51 262
Generation	-112	-231	119	-750
Sales and trading	-735	-986	251	-3 683
Customers	-6 492	-6 583	92	-25 335
Other	-136	-146	10	-443
Energy purchase	-7 474	-7 947	473	-30 212
Transmission costs	-364	-309	-55	-1 112
Net operating revenues	6 487	5 952	535	19 938

In the graph above Generation, Sales and trading, Customers and Other are shown as sales revenues less energy purchase

- → Net generation revenues have increased compared to corresponding quarter in 2015 mainly due to higher production in Nordic hydro assets and new capacity in International hydropower.
- Net customer revenues have decreased compared to corresponding quarter in 2015 mainly due to low profitability from origination portfolios.
- → Net other revenues have increased compared to corresponding quarter in 2015 mainly due to higher distribution grid revenue sales in Norway and Peru.

- → Share of profit/loss in equity accounted investments have decreased compared to corresponding quarter in 2015, mainly due to lower spot prices in the Nordic market.
- → Other operating revenues have increased compared to corresponding quarter in 2015 due to various minor items.
- → Transmission costs have increased compared to corresponding quarter in 2015 due to higher production.

OPERATING EXPENSES - UNDERLYING

	First quarter			Year
NOK million	2016	2015	Change	2015
Operating expenses, underlying				
Salaries and payroll costs	-975	-853	-122	-3 545
Depreciation	-894	-754	-140	-3 354
Property tax and licence fees	-416	-416	0	-1 679
Other operating expenses	-846	-723	-123	-3 861
Operating expenses	-3 131	-2 745	-385	-12 440

- Operating expenses were higher due to increased activity within International hydropower, mainly related to acquisitions in Brazil and Chile.
- → Operating expenses also increased in Wind power due to the onshore wind projects in Central-Norway and restructuring costs within offshore wind.
- → A weaker NOK contributed to a further increase in operating expenses.

ITEMS EXCLUDED FROM THE UNDERLYING OPERATING RESULT

Unrealised changes in value on energy contracts and significant non-recurring items have been excluded from the underlying operating profit. The unrealised changes in value are partly due to the Group's energy contracts being indexed against various commodities, currencies and other indexes.

	First quarter			Year
NOK million	2016	2015	Change	2015
Items excluded from the underlying operating profit				
Unrealised changes in value of energy contracts	-593	-518	-75	609
Significant non-recurring items	-	-	-	-3 610
Gain from sale of assets	-	-	-	226
Impairments	-	-	-	-3 836

→ There was a negative development on long-term power sales agreements denominated in EUR due to a stronger NOK against EUR. There was also a negative development on long term contracts in Brazil. In addition there was realisation of profits on some of the other energy contracts included in this table.

FINANCIAL ITEMS

	First quarter			Year	
NOK million	2016	2015	Change	2015	
Financial items					
Interest income	76	95	-19	378	
Other financial income	5	7	-2	43	
Gross financial income	81	102	-21	421	
Interest expenses	-316	-246	-70	-1 322	
Other financial expenses	-50	-179	129	-736	
Gross financial expenses	-366	-425	59	-2 058	
Currency gains and losses	1 316	3 480	-2 164	-3 445	
Other financial items	144	-170	315	-237	
Net financial items	1 176	2 987	-1 811	-5 318	

- Interest income decreased by NOK 19 million, mainly due to lower average liquidity.
- → Interest expenses increased by NOK 70 million, mainly due to lower capitalisation of borrowing costs in projects and increased debt.
- Other financial expenses fell by NOK 129 million, mainly as a result of costs related to refinancing in Peru in first quarter 2015
- → Net currency effects in the first quarter amounted to NOK 1316 million, primarily related to a strengthening of NOK against EUR and GBP. Strengthening of EUR against GBP, and strengthening of NOK against USD reduced the positive effect
- → Other financial items included gains on interest rate derivatives and obligations linked to equity instruments.

TAXES

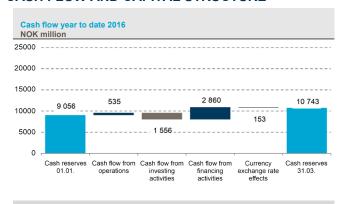

A tax expense of NOK 1550 million was recorded in the first quarter (NOK 1993 million). The decrease in tax expense is mainly due to lower profit before tax, partly offset by higher resource rent tax payable.

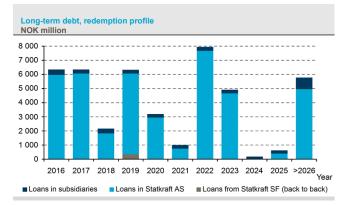

RETURN

ROACE¹⁾ was on par with the year 2015. Higher underlying operating profit for the previous twelve months was offset by an increase in average capital employed.

CASH FLOW AND CAPITAL STRUCTURE

Cash flow

- → Cash flow from operating activities amounted to NOK 535 million (NOK 3276 million). Net income²⁾, adjusted for non-cash effects, were NOK 1738 million (NOK 5010 million) including changes in short and long term items. The changes in short and long term items had an effect of NOK -850 million (NOK 2665 million), of which short-term items were NOK -726 million (NOK 2695 million). The change in short term items was mainly related to working capital and cash collateral. Taxes paid were NOK -1223 million (NOK -1741 million) and cash effect from dividend from equity accounted investments were NOK 20 million (NOK 7 million)
- → Net investments³⁾ amounted to NOK -1556 million (NOK -1736 million). This was primarily investments in property, plant and equipment totaling NOK -1622 million (NOK -1715 million) and repayment of loans from third parties of NOK 128 million (NOK 100 million)
- → The net liquidity change from financing amounted to NOK 2860 million (NOK 5474 million). New debt totalled NOK 2903 million (NOK 7604 million), while repayment of debt was NOK -43 million (NOK -1976 million).

Financial structure

At the end of the guarter, Statkraft had the following financial structure:

- → Net interest-bearing debt⁴⁾ totalled NOK 36 136 million, compared with NOK 35 036 million at the beginning of the year. The increase was primarily related to new debt in Statkraft AS
- → The net interest-bearing debt-equity ratio was 29.2%, compared with 28.4% at year-end 2015.
- → Current assets, except cash and cash equivalents, amounted to NOK 19 677 million.

¹⁾ ROACE (%): (Operating profit adjusted for share of profit/loss in equity accounted investments, unrealised changes in the value of energy contracts and significant non-recurring items x 100) / average capital employed.

²⁾ Net income: cash flow from operations excluding taxes paid and cash effects from equity accounted investments.

³⁾ Net investments include investments paid at the end of the quarter, payments received from sale of non-current assets, net liquidity out from the Group upon acquisition of activities and repayment and disbursement of loans.

⁴⁾ Net interest-bearing debt: Gross interest-bearing liabilities – bank deposits, cash in hand and similar excluding restricted funds – short-term financial investments.

- → Short-term interest-free debt was NOK 16 998 million.
- → Statkraft's equity totalled NOK 87 760 million, compared with NOK 88 340 million at the start of the year. This corresponds to 49.7% of total assets.

INVESTMENTS AND PROJECTS

Total investments in the quarter amounted to NOK 1689 million. Maintenance investments and other investments were primarily related to Nordic hydropower. Investments in new capacity were mainly within hydropower developments in Albania, as well as wind power developments in Sweden and the UK.

³⁾ The project consists of six windfarms with planned completion between Q4 2018 and Q4 2020.

8

Segments

The Group reports operating segments in accordance with how the corporate management makes, follows up and evaluates its decisions. The operating segments have been identified on the basis of internal management information that is periodically reviewed by the management and used as a basis for resource allocation and key performance review.

In 2016 Statkraft has changed the segment structure. The two former segments Nordic Hydropower and Continental Energy and Trading are replaced by European Flexible Generation and Market Operations. The reason for changing the segments is to make sure that the reporting structure is aligned with the strategic focus areas and the key priorities within the Group. The developed strategy has led to a clearer distinction between power generating assets and market operations.

The new European Flexible Generation segment mainly consists of the hydropower business in the Nordic region, Germany and the United Kingdom, as well as the gas power plants, the subsea cable Baltic Cable and the bio-power plants in Germany. The main focus for the segment is to maximise the long-term value of the asset base.

The new Market Operations segment mainly consists of market access, trading and origination activities. The activities will gradually increase to create new business opportunities in a changing European market. In addition, Statkraft aims to develop market operations in selected international markets were the Group owns assets.

The other segments are not changed compared to previous years.

The comparable figures are restated.

Highlights in the quarter

→ The Norwegian Water Resources and Energy Directorate (NVE) granted Naturkraft permission to shut down the Kårstø gas power plant.

Quarterly financial performance

→ Underlying EBITDA was higher than in the same quarter of 2015, mainly due to higher production. Nordic power prices were lower in EUR/MWh, but this was partly offset by a weaker NOK compared to EUR. Operating expenses were higher, partly due to currency effects from a weaker NOK.

Quarterly investments

Investments were mainly related to Nedre Røssåga, Lio and Ringedalen power stations.

Highlights in the quarter

→ The first solar leasing deal in India was closed in February. The power purchase agreement is covering a period of 25 years.

Quarterly financial performance

→ Underlying EBITDA was lower compared with the same quarter of 2015 mainly due to lower results from trading and origination.

Investments in new capacity	290	456	3 048
Investments in shareholdings	3	-	3 399
Production, volume sold (TWh)	1.2	0.6	3.6

Quarterly financial performance

- → The increase in underlying EBITDA compared with the first quarter of 2015 was related to the consolidation of the activities from the additional acquisitions of 40.65% of Statkraft Energias Renováveis (SKER) in Brazil and contribution from the Cheves project in Peru and the Kargi project in Turkey in combination with positive currency effects.
- → The increase in share of profit/loss in equity accounted investments was primarily related to redused transmission costs in India.

Quarterly investments

→ Investments in new capacity were mainly related to the hydropower developments in Albania.

Investments in shareholdings	32	98	101
Production, volume sold (TWh)	0.5	0.6	2.2

Highlights in the quarter

→ Statkraft, TrønderEnergi and the European investor consortium Nordic Wind Power decided to build 1000 MW onshore wind power in Central-Norway. The construction has started. Once completed and commissioned in 2020, the Fosen project is expected to generate 3.4 TWh annually.

Quarterly financial performance

→ The underlying EBITDA was negatively affected by both lower power prices and lower onshore power production due to low wind speeds compared to Q1 2015. In addition, one-off restructuring costs due to change in the offshore wind strategy had a negative effect. However, a new wind farm in operation had a positive contribution to the segment's EBITDA.

Quarterly investments

→ The investments were mainly related to Dudgeon offshore wind farm outside the coast of the UK. In addition, there were investments related to onshore wind farms in Sweden and the UK.

other investments	1	2	10
Investments in new capacity	14	70	272
Investments in shareholdings	_	-	18
Production, volume sold (TWh)	0.4	0.3	0.8

Highlights in the quarter

Completed reconstruction of peak load in Åmål in Sweden. After this, Statkraft's heating production in Sweden is fossil free in normal years.

Quarterly financial performance

→ EBITDA was higher than the same quarter in 2015 primarily due to higher volume delivered to customers, the acquisition of Gardermoen, better price on waste handling, high availability and good fuel mix.

Quarterly investments

→ The investments were primarily related to pipelines in existing activities.

INDUSTRIAL OWNERSHIP1)

¹⁾ Industrial ownership includes the shareholdings in Skagerak Energi, Fjordkraft, BKK, Agder Energi and Istad. The two former companies are included in the consolidated financial statements, while the other three companies are reported as associated companies.

Highlights in the quarter

BKK has entered into a contract with Statnett to sell its existing central grid assets.

Quarterly financial performance

- → The increase in underlying EBITDA compared with the first quarter in 2015 was related to higher income from generation and grid operations.
- → The share of profit in equity accounted investments decreased as a result of lower power prices.

Quarterly investments

Investments in new capacity and maintenance were mainly related to transmission grid.

¹⁾ Other activities includes innovation and Group functions. Small-scale hydropower was included in 2015.

Highlights in the quarter

→ On 11 March, Statkraft issued a EUR 200 million bond with a maturity of 2 years.

Quarterly financial performance

→ The increase in EBITDA in the first quarter was mainly due to increased internal invoicing.

Quarterly investments

→ Other investments in the quarter were mainly related to office facilities and IT.

Outlook

Low European power prices and a power surplus in the Nordic region have resulted in a low Nordic power price level. However, a significant share of the Group's power generation is sold through long-term power contracts which help to stabilise the Group's revenues in the coming years.

In several emerging markets there is a rising demand for energy. Based on Statkraft's core expertise, this provides opportunities for value creation within renewable energy. The acquisitions in Chile and Brazil and completion of new hydropower plants in 2015 have strengthened Statkraft's position and will result in increased income from the Group's international operations.

Statkraft will continue to adapt the investment level to the financial capacity.

¹⁾ Realised currency effects from internal loans are shown on a separate line. Previous periods, these effects have been shown as part of changes in short term items.

²⁾ Investments in the cash flow are NOK 30 million lower than investments in fixed assets in the segment reporting due to acquisition of assets not paid as of first quarter 2016.

³⁾ Included in cash and cash equivalents are NOK 507 million related to joint operations as of first quarter 2016

Selected notes to the accounts

1. FRAMEWORK AND MATERIAL ACCOUNTING POLICIES

The consolidated financial statements for the first quarter of 2016, closed on 31 March 2016, have been prepared in accordance with the accounting principles in International Financial Reporting Standards (IFRS) and consist of Statkraft AS and its subsidiaries and associates. The interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting. As the information provided in the interim financial statements is less comprehensive than that contained in the annual financial statements, these statements should therefore be read in conjunction with the consolidated annual financial statements for 2015. The interim accounts have not been audited. The accounting principles applied in the interim financial statements are the same as those used for the annual financial statements.

Presentation of share of profit or loss from joint ventures and associated companies with operations closely related to Statkraft's operations is from Q1 2016 presented as a separate line item under gross operating revenues and part of operating profit/loss. Earlier profit or loss from joint ventures and associated companies was presented on a separate line between operating profit/loss and net financial items.

Presentation of the disclosures of sales revenue and energy purchase is changed from Q1 2016 with the purpose to better present the Group's main revenue streams.

The comparable figures are restated.

2. PRESENTATION OF FINANCIAL STATEMENTS

The presentation in the interim report has been prepared in accordance with the requirements in IAS 34. The schedules comply with the requirements in IAS 1.

3. ACCOUNTING JUDGEMENTS, ESTIMATES AND ASSUMPTIONS

In applying the Group's accounting principles to the preparation of the interim financial statements, the management has exercised its judgment and employed estimates and assumptions that affect the figures included in the income statement and balance sheet.

The most important assumptions regarding future events and other significant sources of uncertainty in relation to the estimates, and which may involve a significant risk of material changes to the amounts recognised in future financial periods, are discussed in the annual financial statements for 2015.

In preparing the consolidated financial statements for the first quarter, the Group's management has exercised its judgment in relation to the same areas where such judgment has had material significance in relation to the figures included in the Group's income statement and balance sheet, as discussed in the annual financial statements for 2015.

4. SEGMENT REPORTING

The Group reports operating segments in accordance with how the corporate management makes, follows up and evaluates its decisions. The operating segments have been identified on the basis of internal management information that is periodically reviewed by the management and used as a basis for resource allocation and key performance review.

In 2016 Statkraft has changed the segment structure. The two former segments Nordic hydropower and Continental energy and trading are replaced by European flexible generation and Market operations. The reason for changing the segments is to make sure that the reporting structure is aligned with the strategic focus areas and the key priorities within the Group. The developed strategy has led to a clearer distinguishment between power generating assets and market operations.

See page 8 for more information.

5. UNREALISED EFFECTS PRESENTED IN THE INCOME STATEMENT

The table below shows the lines in the financial statements where the unrealised effects appear.

6. CURRENCY EFFECTS ON INTERNAL LOANS

Net currency effects on internal loans as of the first quarter amounted to NOK - 135 million, of which NOK - 701 million was unrealised and NOK 565 million was realised. The negative unrealised effect was mainly a result of a weaker GBP (loan currency) against EUR (functional currency in lender) and weaker USD (loan currency) against NOK (functional currency in lender). The realised positive effect is mainly a result of a stronger NOK against EUR and GBP regarding cash pool.

Statkraft Treasury Centre (STC), Statkraft International Hydropower Invest AS (SKIHI) and Statkraft International Hydropower Holding AS (SKIHH) provide loans to the Group's companies, mainly in the borrowing companies' local currency. STC prepares its accounts in EUR and SKIHI/SKIHH in NOK. All three companies report currency effects of lending in the income statement. STC's financial reporting is converted to NOK in the consolidation, and currency effects for the net investment in STC are reported in other comprehensive income.

The same principle will apply for loans in local currencies provided from foreign subsidiaries to Statkraft AS through the Group cash pool. As the liquidity situation will vary over time, Statkraft AS may also be the lender at the period end. In such situations the effect recognised in the income statement is not offset by a corresponding effect through other comprehensive income.

7. HEDGE ACCOUNTING

Statkraft has used hedge accounting in 2016 that has reduced the volatility in the income statement. A major share of the debt in EUR has been hedged against market rate changes.

Statkraft has set up hedge accounting of parts of the net investments in STC in EUR, as well as parts of the net investments in Statkraft UK Ltd in GBP. The effect of this is that a gain of NOK 449 million in 2016 is recognised in other comprehensive income instead of in the income statement.

8. BRAZIL

On 13 July 2015, Statkraft acquired a controlling interest in the Brazilian company Desenvix Energias Renováveis S.A. which subsequently changed name to Statkraft Energias Renováveis. Over the past years, Brazil has experienced several severe corruption cases. On this background, Statkraft has initiated an internal investigation related to the subsidiary acquired in 2015. The process is still ongoing and it is at this stage not possible to predict if the outcome could have potential negative effects on the fair values of assets and liabilities at the date of acquisition.

9. TRANSACTIONS

Statkraft has entered an agreement to sell its 30% holding in the associate Nividhu Pvt. Ltd. in Sri Lanka. The transaction is expected to take place in the second quarter in 2016.
